Впровадження внутрішньої системи забезпечення якості вищої освіти є одним із ключових завдань українських університетів. Згідно із вимогами Міністерства освіти і науки України така система повинна базуватися на принципах, які задекларовані в «Standards and Guidelines for Quality Assurance in the European Higher Education Area (ESG)» сформованих в м. Єрван, Вірменія в 2015. Впровадження такої системи доцільно робити із залученням Європейських партнерів, які мають значний досвід у впровадженні внутрішньої системи забезпечення якості в університеті, а також, що головне у формуванні культури забезпечення якості в працівників закладу вищої освіти (ЗВО). Починаючи із жовтня 2017 року Національний університет “Львівська політехніка” є членом консорціуму із реалізації Еразмус+ KA2 проекту «Імплементация системи забезпечення якості освіти через співробітництво університету-бізнесу-уряду в закладу вищої освіти» (EDUQAS) 586109-EPP-1-2017-1-RO-EPPKA2-CBHE-SP, який спів фінансується Європейською Комісією. Даний проект має структурний характер, що означає необхідність використання його результатів на національному рівні.

Окрім, Львівської політехніки партнерами проекту зі сторони України є Харківський національний економічний університет ім. Семена Кузнеця, Донецький державний університет управління, Україна, Національна металургійна академія України, Національне агентство з забезпечення якості вищої освіти, Міністерство освіти і науки України. Європейську частину консорціуму представляють Університет Крайова, Румунія, Університет Льєж, Королівський технологічний інститут КТН, Пловдивський університет «Paisii Hilendarski», Латвійський університет, Університет Лотарингії та Вища рада з оцінки досліджень та вищої освіти. На сьогодні, проект пройшов стадію аналізу існуючої системи забезпечення якості в Львівській політехніці. В результаті аналізу було виявлено ряд сильних сторін забезпечення якості освітніх послуг в університеті. Наведено тільки декілька із них: Львівська політехніка має розроблену політику забезпечення якості, яка базується на стандартах ESG 2015 та політика з питань забезпечення якості є елементом стратегічного менеджменту, який реалізується в університеті. Одночасно, було виявлено низку слабких сторін, а саме: механізми із забезпечення якості в університеті є часто формальними та недорозвиненими і інколи суперечать самій суті ESG 2015 та сучасні методи навчання не завжди використовуються для викладання освітніх програм.

Важливо підкреслити, що в Європейському розумінні ключовим елементом внутрішньої системи забезпечення якості є «внутрішня» акредитація освітніх програм. Відповідно, в межах проекту планується також проводити пілотний самоаналіз освітніх програм, базованих на стандартах ESG 2015 та залучити Європейських партнерів для формування рекомендацій щодо їх удосконалення. Самоаналіз освітніх програм планується здійснювати в інституті економіки і менеджменту Національного університету «Львівська політехніка». Реалізація проекту частково затрималася через затримку із створенням НАЗЯВО, яке має розробити нові вимоги для акредитації освітніх програм. На сьогодні, робота в цьому напрямку активно ведеться, що суттєво прискорить реалізацію проекту EDUQAS. Даний проект дозволить нашому університету бути в тренді щодо впровадження сучасної внутрішньої системи забезпечення якості в університеті.
